About

I am a passionate full-stack developer who has led teams across diverse environments and built software that matters. My professional background includes working on mission-critical emergency services systems, innovative safety management solutions, groundbreaking interactive experiences, and tools that have engaged and supported vulnerable communities. Proficient in multiple languages and frameworks, I bring creative problem-solving and a human-centered design approach to applications where user experience is critical.

Experience

Genvis, Technical Lead

Perth, WA
2022 – 2025
3 years

- Delivered the successful pitch to secure the Emergency WA platform rework contract for the WA Government's Department of Fire and Emergency Services (2024)
- Led teams across multiple phases to deliver Emergency WA, a mission-critical and highly available emergency services platform serving all responders across WA
- Rapidly rebranded, reconfigured and deployed our solution to support the Manitoba government during 2025 Canadian wildfire crisis, enabling critical emergency response coordination for vulnerable populations
- Ensured 99.9999% uptime through AWS multi-region architecture, auto-scaling, Cloud-Watch alerting and automated disaster recovery
- Maintained active security clearance for government systems access
- Architected and developed highly available software solutions using modern frameworks and AWS cloud infrastructure
- Established coding standards, review processes, and WCAG 2.2 accessibility compliance across all platform applications
- Coordinated agile workflows and sprint planning for distributed development team as Scrum Master

Insig Technologies, Senior Developer

Perth, WA
2019 – 2022
3 years

- Architected and developed innovative software solutions using modern frameworks and on-premise Kubernetes cluster deployments
- Managed on-premise deployments across multiple mining operations in developing nations
- Developed VR safety training and LiDAR visualizations for international mining operations
- Created reusable UI library adopted across 6 projects, reducing development time and ensuring UX consistency
- Transformed complex industrial workflows into user-friendly digital experiences
- Coordinated agile workflows and sprint planning for distributed development team as Scrum Master

Binary Space, Lead Developer

Perth, WA
2017 – 2019
2 years

- Led a team to develop 'Ghoul Britannia: Land of Hope and Gorey', featured in gaming press and exhibited at conventions across Australia, America, and Europe
- Released on Steam with positive reception; Nintendo Switch release in development
- Established agile workflows and drove technical architecture, code reviews, and QA processes for the distributed team

Immersia , Developer - Built multiple VR applications during the platform's early era, working with development kits and emerging hardware - Adapted to VR-specific challenges including spatial design, performance optimization, and motion comfort	Perth, WA 2016 – 2016 1 year
SK Games , Developer - Showcased 20+ interactive titles to 45,000+ attendees at ACMI Melbourne, PAX Australia, and GCAP - Pioneered accessible gaming solutions for non-traditional exhibition spaces - Contributed to company's evolution from indie studio to established Interactive Gallery in Melbourne	Perth, WA 2011 – 2015 4 years
Independent Practice , Freelance Developer and Visual Artist - Created interactive art, procedural audio-visual systems, and experimental software across multiple platforms - Engaged with indie development community through releases, presentations, and collaborative projects	Aus. and International 2010 – 2017 7 years

Education

BSc Edith Cowan University , Computer Science	Perth, WA / Online
BSc Qantm College , Interactive Entertainment Technology	Perth, WA
BArch University of Western Australia , Environmental Design	Perth, WA
TER Sacred Heart College , 96.25	Perth, WA

Technologies

Frontend: Vue, Pinia, React, Redux, TypeScript, JavaScript, CSS/SCSS, Vitest, Cypress, Jest, WebGL, GLSL

Backend: PostgreSQL, MongoDB, Prisma, Python, Rust, C#, Entity Framework, RESTful APIs, GraphQL

Cloud & DevOps: AWS (Lambda, Lambda@Edge, S3, CloudFront), Kubernetes, Terraform, Docker, Azure DevOps, Git

Interactive Media & 3D: Unity, Unreal Engine, XNA, three.js, Blender, Maya, 3ds Max

Achievements

Emergency Response Platforms: Pitched and delivered Emergency WA platform for WA Government's Department of Fire and Emergency Services; rapidly adapted solution for Manitoba government during 2025 Canadian wildfire crisis

Government Security Clearance: Maintained active security clearance for mission-critical government emergency services infrastructure (2022-2025)

International Game Exhibition: 'Ghoul Britannia' showcased at conventions across Australia, USA, and Europe; released on Steam to positive reception (2017-2019)

Museum & Festival Exhibition: Interactive works exhibited at ACMI Melbourne, PAX Australia, GCAP, and V&A Museum London, reaching 45,000+ attendees (2011-2018)

Live Performance: 3D visualization and procedural music performances at Square Sounds Festival, Melbourne and Tokyo (2015-2019)
